# Headlines

**WELCOME** to the first issue of Horsford Holla. Our first newspaper is about our amazing animals. In this newspaper you will find lots of facts, puzzles, cute animals and much more!

## Dogs or Cats?

Let's start with a debate that has been going on for many years. Cats Vs Dogs. Do you have a favourite? Do you have cats and dogs? In many people's opinion, dogs are better than cats. Dogs are more trainable, use the bathroom outside, can protect you, and promote a more active lifestyle. However, many people think that cats are better than dogs. Cats are easy to care for, quiet, and relatively affordable. They even groom themselves. Comparing dogs and cats is like comparing apples to oranges. Can't we all just get along? Cats and dogs can learn to live happily together. Why choose? Just get both!

### Shark on the beach!

Written by Ruby Casanova

**O**n cape cod beach some people found a great white shark stuck on the shore after he had chased some seagulls. He was a very fierce predator but now he was stuck and struggling to get in ocean.

### **How the beach goers helped**

The beach goers got buckets full of water and threw the water at the shark to help him to breathe. They tied a rope around his tail making sure they are far away from his teeth. They tied it up tight to a speed boat to pull the almost lifeless shark back to his home deep in the ocean. They held his head with another rope and carefully let him into the ocean were the shark was safe and sound.

Protecting the earths animals is our very important responsibility we need to keep them safe.

## Global News

## *Endangered tigers making a comeback*

*Tiger populations have been in rapid decline for decades now. It started in 2010 there were as few as 3,200 tigers in the wild. But now five countries - India, China, Nepal, Russia and Bhutan - have given hope for the future. Experts are even describing it as a "remarkable comeback".*

*Tigers can thrive happily given enough space, food and water. So the progress is a result of tigers and their habitat being better protected. Becci is WWF's UK regional manager and says while this is good news, threats still exist to the tiger population.*

*"The reason why numbers have plummeted over the last 100 years or so is because of changes to land use," she says. Loss of habitat, hunting and poaching remains a very real threat.*

## *What can we do to help tigers?*

*We need to share our enthusiasm for tigers and tell our friends and family how important it is. We can ensure the items we buy, such as wood and paper, don't come as a result of illegal logging, which harms tigers.*

*If you look at the labels, you can see that if you get it from the right source, you may be helping to protect those forests, habitats and tigers. With a collective effort, we can turn the tide for tigers.*

## Fact Finders

# Slow Worms

## What are slow worms?

Slow worms are reptiles, and they look a lot like snakes. Slow worms are scaly, but they are not snakes. When the sun is very hot the slow worms bask in the sun.

## What is the slow worm breeding pattern?

Slow worms breed once every two years, and eight live young are born August to September.

## Habitat

Slow worms' habitat is gardens farms and woods. They can be found in heathland, tussocky grassland, woodland edges. Slow worms are quite widespread throughout Britain and most common in Wales and southwest England. Slow worms hibernate from October to March.

## What do slow worms eat?

Slow worms eat slugs, worms, bugs and insects.

## Exciting Animals

### Caracal

Caracals' whiskers are as unique as human fingerprints. Each ear has a ~~dis~~ distinct pattern where the whiskers attach.

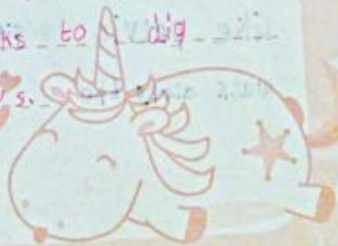

### Volcano rabbit

This Rabbit hangs out on volcanos. It can only be found in grassy pine forests located high on the slopes of four volcanos in Mexico.

### Atlantic Puffin

They dig burrows using their claws and their beaks to dig 1 meter long burrows.

I ♥ UNICORNS

### Hazel Dormouse

They can climb trees. These nocturnal creatures live in woodland and use their scurrying to scamper into trees and storage for seed.

### Amur Leopard

The Amur Leopard has a series kind of call and doesn't really grow at all.

### Mandarin fish

Mandarin fish like to walk. They can use their soft like pelvic fins to walk along the seaboard.

## Fact Finders

# Big Cats

Big cats are things like jaguars, lions, tigers and leopards. The difference between big cats and other cats is that big cats can roar.

### Where do big cats normally live?

Big cats live in a variety of different habitats. Some live in swamps and others live in forests, and other places too!

### What do big cats eat?

They hunt for their food animals like deer, fish, birds and reptiles. They eat everything including the bones.

### Interesting facts:

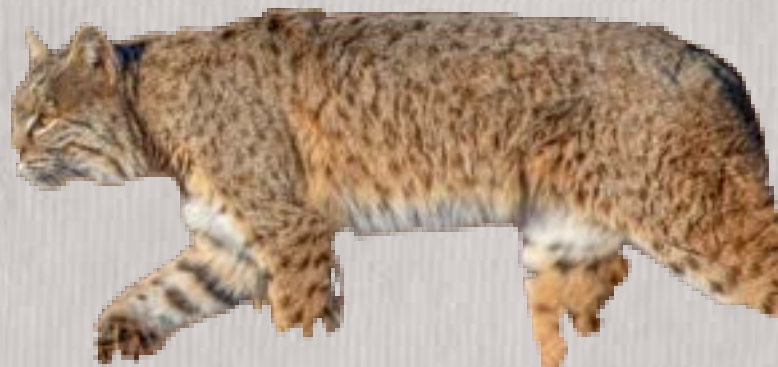

A lion's roar can be heard from 5 miles away!!!

Tigers are the most threatened big cat with extinction.

Big cats cannot purr!

The lion is the only big cat that is social the rest of them live on their own.

## The ukrainian cake sale

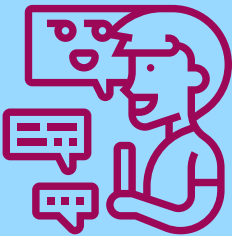

You must be aware that Russia has declared war on Ukraine. All of the Ukrainians need our help.

Thankfully Immy and Lucia (year 6 girls) helped the Ukrainians by doing a cake sale and they raised the fantastic amount of £210 18p.

We would like to thank them for all their hard work. I think it will be much appreciated by the Ukrainians.

## Interview a teacher

Our lead editor Lauren was able to stop and interview some of our busy teachers and ask them an important question...

# What animal would you be and why?

**MRS BILLIG**

I would like to be a dolphin because they are very clever.

**MISS SMITH**

I would like to be a bird. I would love to be able to fly.

**MRS POTTER**

I would like to be a badger because they are cute.

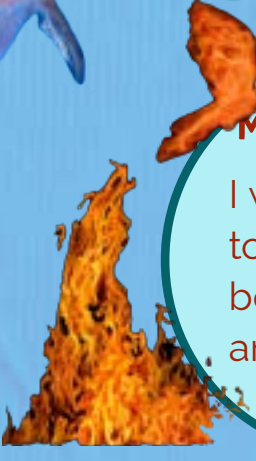

**MRS SMITH**

I would like to be a sea otter because they lay on the beach all day.

**MRS BARRETT**

I would like to be a phoenix because they are magical.

**MR PATIENT**

I would like to be a dog because I love to walk.

# HAPPY HORSFORD

## POSITIVE VIBES

This section is destined to make you feel happier.

**Did you know animals can improve your positive wellbeing?**

Animal can improve your social skills and physical health, but did you know that they are also good for your mental health? A wander round a zoo can get you outdoors and inspired by the wonders of our animal kingdom. Animals can support socialising and they help us build healthy habits, especially dogs that get us outside and walking around.

# Cutest Pet

What an uplifting job this has been. This has already cheered up all the people involved in organising this competition.

Mrs Westlake has loved receiving all of the photos. It brightens her day. Thank you to everyone that has sent in or given us a photo of their pets. Please take a look at all of the entrees and I hope it cheers you up as much as it has

us.

The toughest job was to pick the winner as every single pet is cute. But, after a lot of debating the winner has been chosen. Flick through the newspaper and you will see the page dedicated to the cutest pet.
